

Holland.Malt
your quality in our hands

To whom it may concern

Quality Statement

We hereby declare that all our products comply with the existing EU directives on:

- mycotoxins
- residues of pesticides
- heavy metals
- radionuclides

Furthermore, we declare that HOLLAND MALT processes only non-Genetically Modified raw materials (non-GMO). Consequently all our products are non-GM products according to the Directives 2003/1829/EC and 2003/1830/EC.

All products of Holland Malt are fully traceable and are thus in accordance with Directives 2002/178/EC and 2004/1935/EC.

All products of Holland Malt fall within the scope of a certified management system for food safety, viz. ISO 22.000. Production at Holland Malt is carried out in restricted and controlled access areas, with mandatory identification and registration of all visitors. A risk analysis defining critical control points, corrective actions, traceability of packaging, raw materials and end-products, responsibility of management and operators and food fraud is part of this management system.
